

# Data Platform Check Navigator

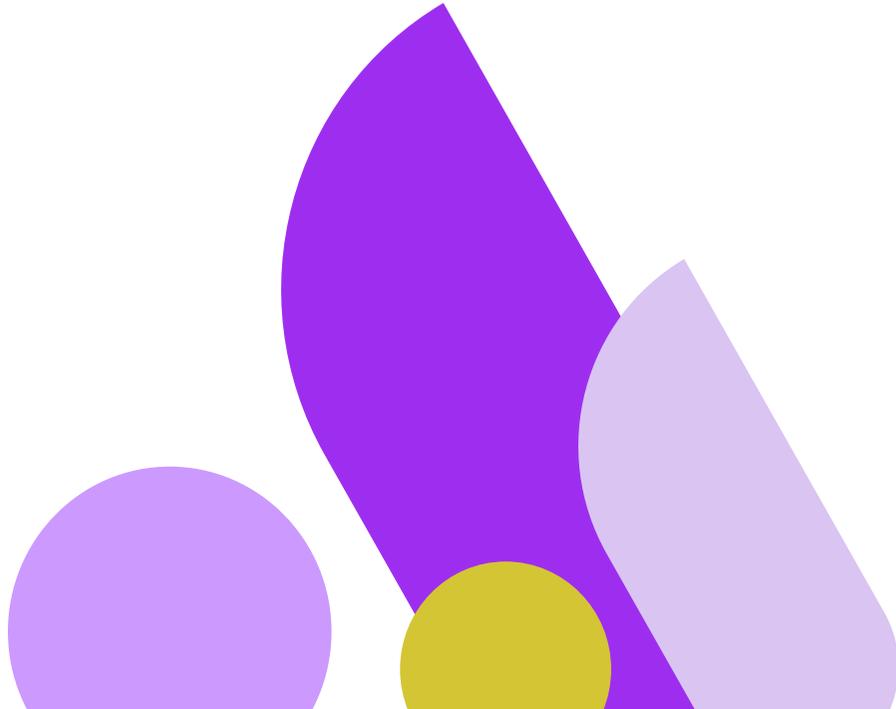

ANS

Think Bigger.

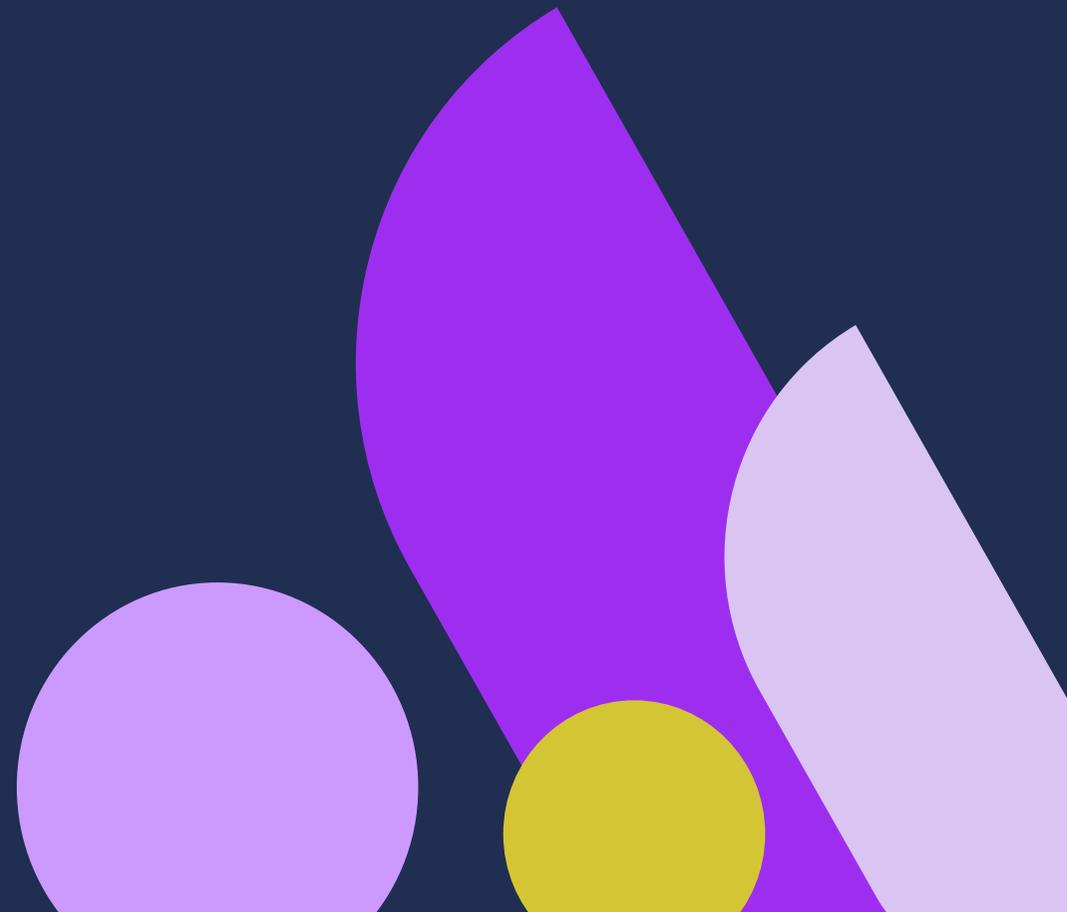

# What are ANS navigators?

Navigators are complimentary engagements that provide you with the resources and information to be able to realise your long-term strategic vision and steer your digital transformation journey.

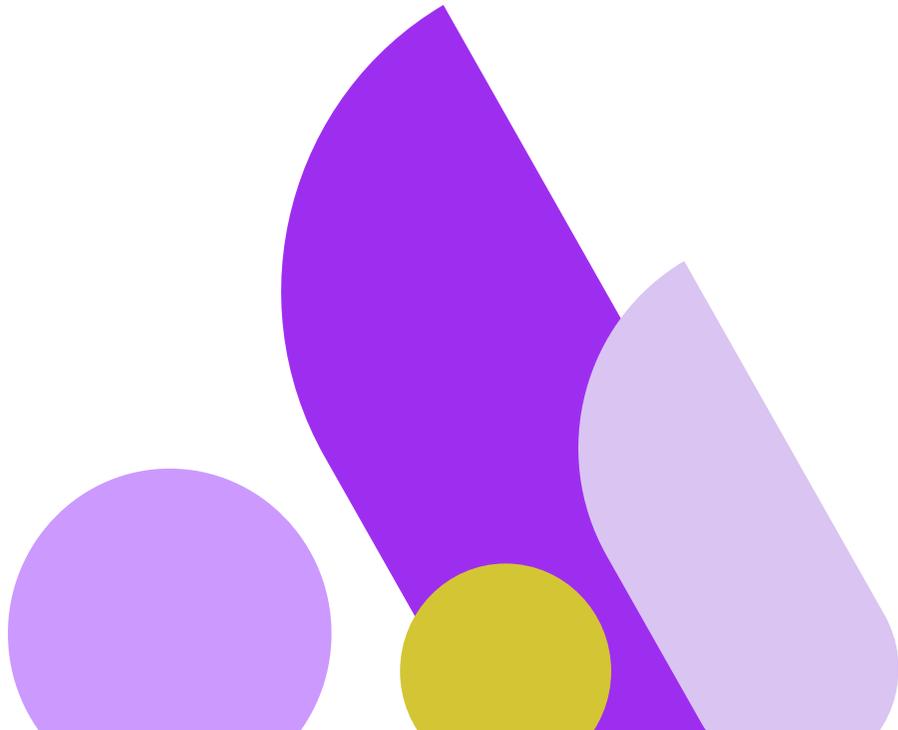

# What is the Data Platform Check Navigator?

During our Data Platform Check service, we'll review your existing data platform deployed in Azure to evaluate its current health, identify any challenges and problems and make recommendations on how to resolve them. We'll focus on 4 key areas which include architecture, security, governance and efficiencies.

# Who is this suitable for?

This Navigator is ideal for organisations that are already in cloud and are consuming data services. It's also suitable for organisations whose data platform build was completed by a 3rd party or contractor and you're not sure what was built. This service is also helpful if you're experiencing cost increases month and month and aren't sure why.

# What outcomes can I expect?

By the end of this engagement, you will have a clear view of the current health of your data platform and insights and recommendations on how to improve, modernise and increase efficiencies from a resource and cost perspective. We'll also advise on the future state of the Azure Data service landscape and if you are aligned to this.

# What are the benefits of using an ANS Navigator?

## Rapid time to value

It typically takes 4-6 weeks to complete this Navigator, and usually doesn't require more than 10 hours of your time spread over those weeks.

## Board ready outputs

We will provide you with board ready outputs, a strategy document, business base and presentation.

## Insights & recommendations

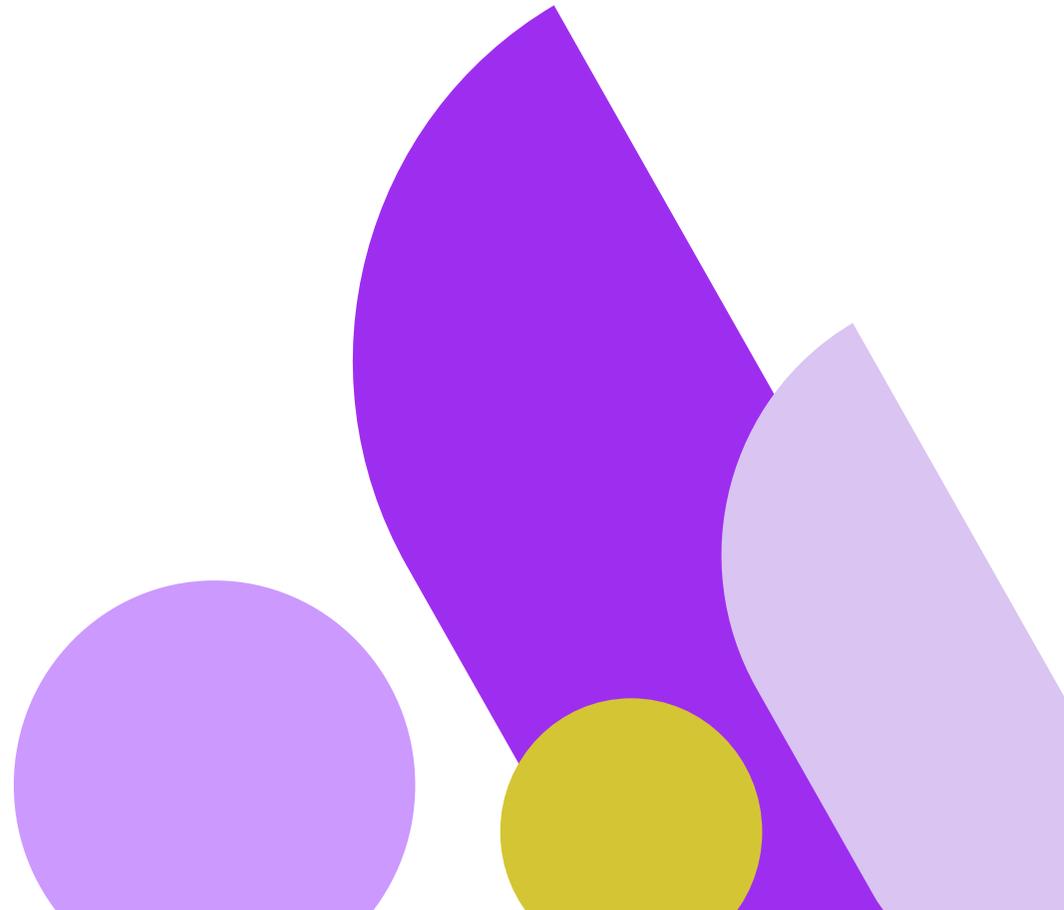

We will provide insights and recommendations on the health of your current IT environment.

## Defined operating model

Moving your data to the cloud is just the beginning. We'll work with you to establish your needs moving forwards, be that training, support or building out capability.
